PROFESSIONAL SUMMARY

Fresh BSIT graduate with hands-on experience in UI/UX design and web design. Skilled in user research, wireframing, Figma prototyping, usability testing, interaction design, information architecture, and design handoff. Familiar with responsive design, accessibility standards (WCAG AA), visual hierarchy, and basic SEO principles. Capable of implementing designs in React and Tailwind CSS. Delivered a government-deployed web application used daily by real residents and staff.

EDUCATION

Bachelor of Science in Information Technology **June 2026**

La Consolacion University Philippines — Malolos, Bulacan

EXPERIENCE

UI/UX Designer & Frontend Developer Intern — Regional Trial Court, Malolos City, Bulacan **Feb – May 2026**

- Designed the court records interface around existing Excel mental models — conducted user research with attorneys and staff, mapped their workflows, and translated findings into a UI adopted daily across the Regional Trial Court.
- Migrated 3+ years of case records (notarial, criminal, civil) from manual Excel to a structured digital platform; also handled frontend implementation and structured QA testing.

TECHNICAL SKILLS

Design: Figma, User Research, Wireframing, Prototyping, Usability Testing, Interaction Design, Design Systems, Responsive Design, Accessibility (WCAG AA), SEO Basics

Tools & Technologies : HTML5, CSS3, JavaScript, React, Tailwind CSS, VS Code, Git, GitHub, Claude AI, Figma, Google Stitch

PROJECTS

QRUSH — Web-Based Barangay Document Request System **Dec 2025 – Jan 2026**

Group Leader · UI/UX Designer · Frontend Developer

- Deployed live at bangkalqrush.com — Barangay Bangkal residents now submit document requests online, track status in real time, and receive SMS updates without visiting the barangay hall.
- Eliminated paper logbooks — barangay staff manage all requests through a centralized dashboard with QR-based transaction completion replacing manual signature checks at the counter.
- Designed 25+ Figma screens and built full-stack in React, Node.js, Express, Firebase, and Supabase — designed and shipped without a separate developer.

LaConsolaNet! — Social Platform UI/UX Redesign **May 2026**

UI/UX Designer · Case Study

- Conducted rapid redesign across 3 deliverables — web app, mobile screens (iPhone 14/15 Pro Max), and landing page — delivered within 5 days before capstone defense.
- Rebuilt visual hierarchy, navigation structure, and component language to align with LCUP's institutional identity; unified design system applied consistently across all 3 surfaces.
- Client rated the redesign 4.9/5.0 — team reported stronger evaluator confidence during defense presentation.
